Design

Work Experiences

I built and launched several websites using MongoDB, Express.js, React.js, and Node.js. I worked closely with clients to understand what they wanted and when they needed it. I made sure the websites looked good and were easy to use on any device. Using MongoDB, I organized the information in a way that made it easy to find and use. I also created special pathways called APIs with Express.js to connect different parts of the website. To keep everything secure, I added special codes to control who could access certain parts of the website. I tested everything thoroughly to fix any problems and make sure it all worked well. And I'm always learning new things to stay up-to-date in web development.

Skills

HTML & CSS	<div><div></div></div>
JavaScript	<div><div></div></div>
Tailwind css	<div><div></div></div>
React js	<div><div></div></div>
Node js	<div><div></div></div>
Express js	<div><div></div></div>
mongoDB	<div><div></div></div>
Problem solving	<div><div></div></div>
Photoshop	<div><div></div></div>
